NR 20.01 Purpose; general restriction. Seasons, bag limits, possession limits and other regulations for fishing in Wisconsin waters are established in this chapter. No person may take, catch, kill or fish for fish of any variety in excess of the daily bag limit, by means other than hook and line, during other than the open season or possess or control any fish in excess of the possession limit or below the minimum size limit, except as expressly provided in this chapter.

NR 20.0125 License waiver. (1) On the first Sunday of June each year, no fishing license is required to fish the inland or outlying waters.

(2) The license waiver of sub. (1) does not apply to commercial fishing license requirements.

NR 20.015 Definitions. For the purpose of this chapter, the following terms are defined as follows:

(1) "Artificial fly" means a single hook dressed with fur, feathers, hair, silk, tinsel, thread or similar material to imitate the natural food of trout.

(2) "Artificial lure" means a bait designed to attract fish which does not include any natural bait.

(2g) "Backtrolling" means to fish from a motor-driven boat while operating the boat in such a way that the boat is progressing toward the rear.

(2m) "Business day" has the meaning given it in s. 421.301 (6), Stats.

(3) "Fisher" means any person engaged in fishing.

Register, December, 1989, No. 408

(4) "Fishing" includes taking, capturing or killing fish or fishing for fish of any variety at any time in the waters of the state.

(4d) "Safe harvest" means a level of harvest that incorporates an appropriate margin of safety, estimates of the population and acceptable exploitation rates which will reasonably prevent harvest of more than 35% of the population of adult walleyes or 27% of the population of adult muskellunge. The margin of safety assures that the true safe harvest is not exceeded in more than 1 of 40 cases. For waters where a population estimate has not been made, a regression model based upon population estimates from other waters will be used. The margin of safety used depends upon the age of the population estimate was made and whether a regression model was used.

(4e) "Secretary" means secretary of the department of natural resources.

(4g) "Setline" means a line with one or more hooks fastened to it and designed to be set or left unattended in the water for the purpose of taking fish.

(4t) "Set or bank pole" means a pole equipped with line with one or more hooks fastened to it, designed to be used for fishing from the banks of lakes or rivers and set or left unattended.

(5) "Telemetry device" means any device attached or implanted in fish that transmits a sonic or electronic signal to aid in fishing.

NR 20.03 Season tables; open and closed seasons, size and bag limits and measurements. (1) The open seasons specified in the following table apply to fishing in open waters and fishing through the ice, except that the department shall close the season for fishing through the ice in any inland waters when it finds after scientific investigation and study that continued fishing through the ice in specified waters would result in a depletion of the supply of game fish and that a closed season is necessary to conserve the fish supply and insure the citizens of this state continued opportunities for good fishing. The closed seasons shall be put into effect by posting a notice on or in the vicinity of the shore of the waters affected. Posting is deemed by the department to be the most feasible way of notifying the public that a closed season is in effect. The closed seasons shall remain in full force and effect so long as the waters are covered with ice and so long as posting is continued. The department may also, following scientific investigation and study, establish bag limits and size limits on the individual inland waters when it finds that the taking of fish will aid in management of the fishery and insure the citizens of this state additional opportunities for good fishing. Such special regulations shall become effective only after public informational meetings are held. The department may also establish an urban fishing program by posting the open and closed seasons on specified waters. For open seasons in specified waters see s. NR 20.04. The possession limit for each species of fish, except trout as specified in sub. (5), shall be double the daily bag limit specified in this chapter except that no person may have in possession or under control more than the daily bag limit while on the ice or waters or while fishing in the state of Wisconsin. The measurement of all fish taken shall be in a straight line from the tip of the snout to the utmost end of the tail fin fully extended.

Note: For a complete history of NR 20.03 see the history note for NR 20.03 as it appeared in the October, 1973 Administrative Register.

NR 20.035 Alternate size and bag limits. (1) **PURPOSE.** Notwithstanding any provision of ch. NR 21, 22, 23 or this chapter, for all or part of any inland, boundary or outlying water, the department may apply the alternate size limits, bag limits or both under this section for fish species identified in this section in order to provide for better use and management of the fishery resource of the water to which the proposed alternate limit would apply.

(2) **PROCEDURE.** The department shall follow the procedures in this subsection in applying an alternate size limit or bag limit under this section.

(a) **Notice.** The department shall prepare and distribute a notice of its intent to apply an alternate limit under this section. The notice shall be published as a class 1 notice under ch. 985, Stats., in a general circulation newspaper in the vicinity of the water and, if the proposal has statewide significance, in the official state newspaper. A copy of the notice shall be sent to individuals and organizations which the department believes may be interested in the matter. The notice shall include a description of the water affected, the fish species affected, the alternate limit which will apply, and the date the alternate limit will take effect. The notice shall invite the public to submit written comments and indicate that a public information meeting will be held on the alternate limit if requested in writing within 10 days after the notice is published.

(b) *Public information meeting.* If a public information meeting is requested under par. (a), the department shall conduct the public information meeting in the vicinity of the affected water. At the meeting the department shall describe the factual basis for its intended decision and shall receive comments from the public on the matter.

(c) *Determination.* If, based on facts and information available to it, including comments received in response to the notice and at any public information meeting which may be held, the department concludes that a condition described in sub. (3) affects fish in a specific water, it shall apply the corresponding alternate limit. The alternate limit shall take effect upon the posting of the notice under par. (d).

(d) *Posting.* The department shall post notice at public access sites on the affected water that an alternate limit applies to a species of fish found in that water. The notice shall set out the name or description of the water or that part of the water to which the proposed alternate limit would apply, the species of fish affected, the corresponding alternate limit and the effective date of the alternate limit.

(e) *List.* The department shall maintain a current list of all waters to which an alternate limit under this section applies. The list shall be available for public inspection at the department's central office during regular office hours.

(3) **ALTERNATE LIMIT.** (a) *Size limits.* No size limit shall apply to walleye, largemouth bass or smallmouth bass if, for the particular species in a particular water, the department finds:

1. Angler exploitation of the species is less than 15% of the population of fish larger than the original size limit.

2. Total adult mortality for that species is less than 30% of the population.

3. More than 10% of the fish tested of that species in the size range from the originally applicable size limit to 3 inches larger than the originally applicable size limit, in filets with the skin on, contain .75 parts per million or more mercury, 2 parts per million or more PCB (polychlorinated biphenyl), 5 parts per million or more DDT (dichloro diphenyl trichloroethane), 5 parts per million or more Toxaphene, 0.3 parts per million or more Chlordane, or 0.3 parts per million or more Dieldrin.

4. Walleye males do not grow to a length of at least 13 inches in 4 years or largemouth bass or smallmouth bass do not grow to a length of at least 12 inches in 5 years in all inland waters lying north of a line beginning at the state highway 70 bridge over the St. Croix river, then east on state highway 70 to its intersection with state highway 27, then south on highway 27 to its intersection with state highway 64, then east along highway 64 to its end, then continuing east to the waters of Green Bay or in inland waters of Brown, Kewaunee or Door counties north of a line beginning with the state highway 29 bridge over the Fox river, then east along state highway 29 to its end, then continuing east to Lake Michigan.

5. Largemouth bass or smallmouth bass do not grow to a length of at least 14 inches in 6 years in inland waters other than those identified in subd. 4.

(b) *Bag limits.* If the department finds under sub. (2) that one or more of the following conditions exists in a particular water, the corresponding alternate bag limit shall apply to the named species of fish in that water.

(4) **TERMINATION OF ALTERNATE LIMITS.** Any time the department has reason to believe that the condition which led to the application of an alternate limit under this section no longer affects a species of fish in a particular water, it may remove the alternate limit by following the procedures under sub. (2) (a) to (c). Following its determination to remove an alternate limit the department shall remove or modify the posted notices of alternate limits and the original bag limit or size limit shall then apply.

NR 20.037 Modifications in daily bag limit and minimum size limit in response to tribal harvest. (1) **ADJUSTMENT.** In order to prevent a total harvest of more than 35% of the adult walleye population or 27% of the adult muskellunge population, the secretary may lower the daily bag limit on walleye and increase the minimum size limit for muskellunge in specific waters in response to the harvest goals of the Chippewa bands for their spear, net or trap fisheries. The adjusted daily bag and size limits shall be in effect until March 1 of the year following the tribal harvest. The safe harvest levels on individual waters shall be determined by the department.

(a) *Walleyes.* The daily bag limit will be reduced when the department is notified by the Chippewa bands of their harvest goals on individual waters. The extent of the reduction depends upon the percent of the safe harvest they intend to take and the age of the population estimate used to determine the safe harvest or if a regression model was used to determine the safe harvest. The daily bag limits to be used with the different percentages and for various basis of determining the safe harvest are as follows:

Reduced daily bag limits for walleye angling

Daily bag limit	% of safe harvest to be speared, trapped or netted		
	current pop. est.	pop. est. made 1-2 yrs. ago	pop. est. made 3 yrs. ago or more or regression model.
4	1-7	1-14	1-20
3	8-18	15-39	21-54
2	19-36	40-76	55-84
1	37-68	77-94	85-94
0	69 or more	95 or more	95 or more

(b) *Muskellunge.* The minimum size limit will be increased when the department is notified by the Chippewa bands that their harvest goal on an individual water is 60% or more of the safe harvest. The minimum size limits to be used with different percentages of the safe harvest are as follows:

Increased minimum size limits for muskellunge angling

% of safe harvest to be speared, trapped or netted by tribes	Minimum size limit
60-94	45 inches
95 or more	55 inches

(2) **READJUSTMENT.** If the Chippewa bands inform the department that they have completed harvesting and their goal has not been reached, the secretary may raise the daily bag limit or reduce the minimum size limit to the limit specified as appropriate using the percent of the safe harvest level expected to be harvested as indicated in sub. (1). If a new population estimate is made, the safe harvest level shall be changed accordingly and the daily bag limit or minimum size limit shall be adjusted according to the percentage of the new safe harvest level that is expected to be harvested as indicated in sub. (1). The readjusted daily bag and size limits shall be in effect until March 1 of the year following the tribal harvest.

(3) **BAG AND POSSESSION LIMITS.** (a) Reduced daily bag limits calculated pursuant to this section are individual lake limits and may be combined, but no person may exceed a total daily bag limit of 5 walleyes.

(b) While fishing no person may possess fish on any water in excess of the bag limit or under the size limit for that water.

(4) **NOTICE.** Adjustments and readjustments of bag limits and minimum size limits under subs. (1) and (2) shall become effective upon publication of the adjustment or readjustment in the official newspaper in the area affected.
